Instructions for the demo

Execute the following commands:

```
terraform init
terraform validate
terraform plan -out "sample.tfplan"
terraform apply "sample.tfplan"
terraform show
```

Note: Points to highlight

- Discuss about null_resource, template_file and how to create invontory file for ansible. Refer to https://www.terraform.io/docs/providers/template/d/file.html to understand template_file

- Refer to https://www.terraform.io/docs/providers/null/resource.html to understand more on data sources null_resource

- Discuss on external dependencies and the purpose of depends_on

- How terraform and ansible can be integrated to provision the infrastructure and configure it.
